## Summary

---

I am a newly qualified Interior Designer, having recently completed my BA(Hons) degree in Interior Design at York St. John University, I am now looking for a position with an interior design agency. Although I have enjoyed all the elements of design covered in my course, my real passion lies in the design of hospitality spaces. Having substantial experience working in the kitchen of a busy restaurant / café has given me valuable insight into the specific design needs in the hospitality sector. A career in hospitality design would enable me to combine these two areas of interest.
